Subject: EPA Fact Sheet re Hoosick Falls ballfield sampling

Good afternoon, Basil, Gene and Nathan – As you may be aware, EPA personnel will be in the Village of Hoosick Falls next week to conduct field sampling in the ballfields. Our public affairs staff will be distributing the attached fact sheet. They have shared it already with the Mayor and your public affairs officers, and plan to share it with elected officials, community members on our list, as well as with media that have been covering this situation closely. Sampling will start as soon as Monday. We look forward to continuing to work with you as we move forward expeditiously on our investigations.
